

**MOXIE 1500 Concrete Sealer** is a ready-to-use, non-toxic, penetrating, permanent concrete sealer hardner specifically formulated, and composed of in-organic, chemically reactive, complex compounds, which allows full penetration up to seven inches. MOXIE 1500 Concrete Sealer undergoes a chemical reaction with the by products of the curing process to form the highest density of cementitious materials, dramatically enhancing all of the natural characteristics of concrete and reducing the capillary voids to practically zero. Suitable for all above/below grade, vertical and horizontal concrete surfaces.

### **MOXIE 1500 Concrete Sealer STOPS:**

- Water and vapor migration up to 231 feet below grade (100 psi)
- Moisture vapor transmission (.015 WVT)
- Plastic shrinkage cracking, curl, laitance, and segregation
- Internal rebar and reinforcing steel corrosion
- Alkali and Efflorescence Attack
- Deterioration and discoloration due to acid rain, and penetration of contaminants

### **MOXIE 1500 Concrete Sealer RESISTS:**

- Highway and marine chlorides, oil, gas, acids, solvents, bacteria, staining due to reactive aggregates, and the harmful effects of ultra-violet rays
- Flaking, scaling and spalling due to freeze-thaw

### **MOXIE 1500 Concrete Sealer REDUCES:**

- Transmission of hazardous gases
- Internal chlorides by 50%, to as much as 90%

### **MOXIE 1500 Concrete Sealer PREVENTS:**

- Rust and water-borne contaminant stains, decreasing maintenance costs
- Lichen, moss and other accretions on the surface, eliminating potential danger or the need for periodic removal

### **MOXIE 1500 Concrete Sealer IMPROVES:**

- Overall quality of concrete, masonry, stucco, shotcrete, gunite and mortar
- Abrasion resistance, reducing damage to the surface caused by heavy equipment
- Flexural and tensile strength
- Bond strength

### **MOXIE 1500 Concrete Sealer INCREASES:**

- High early strength when used as a curing compound
- Surface hardness and density

**BUT MOXIE 1500 Concrete Sealer WON'T**, alter, stain, discolor or change the texture of the surface in any way.

**PLUS . . . MOXIE 1500 Concrete** produces the benefits of a vapor barrier, alkali, efflorescence and corrosion inhibitor, curing agent, dust proofing compound and hardner all combined in an environmentally safe and easy to apply, permanent, concrete sealer. It provides the perfect surface dry condition, eliminating the need for additional primers, or intermediate coats and prepares the concrete for the application of paint, surface coatings, treatments and flooring materials.

**MOXIE 1500 Concrete Sealer** is the most economical, cost effective and simplest solution, for practically every concrete or masonry application, at the cost of a sand/visqueen vapor barrier alone, and all in one easy to apply sealer.

**MOXIE 1500 Concrete Sealer**, safe, economical, and effective, no other concrete sealer can compare!

Field tested and field proven, **MOXIE 1500 Concrete Sealer** works, and we guarantee it for 10 years, now that's simple.
