

Basic use:

MOXIE 3000 SUPER SOAP is used for removing oil, grease, and soil from heavily soiled areas of concrete, painted or unpainted surfaces metal surfaces. May also be used for general cleaning of concrete surfaces. Effective on service station, repair shops, aviation service bays.

Description:

MOXIE 3000 SUPER SOAP when applied to surfaces to be cleaned, reduces foreign materials into suspended particles which are held in solution, and can be rinsed away without re depositing onto clean surfaces. MOXIE 3000 SUPER SOAP is a strong, caustic, alkaline detergent.

Packaging:

MOXIE 3000 SUPER SOAP is available in the following packages:

- ① 55 gallon (U.S.)
- ① 5 gallon (U.S.)
- ① 1 gallon (U.S.)

Application:

1. Pour MOXIE 3000 SUPER SOAP on areas to be cleaned.
2. Agitate/scrub with a stiff bristled, long-handled brush until contaminant is removed from the surface.
3. Rinse off the area with clean water.
4. For heavily soiled areas high pressure rinsing is recommended.
5. Petroleum based and toxic materials MUST be disposed of properly.

NOTE: The use of hot water greatly enhances the effectiveness of MOXIE 3000 SUPER SOAP

Basics of Removing Surface Contamination:

The technical terms for effective cleaning are emulsification, deflocculation, and detergency. Emulsification is the homogenizing of grease, oil, and/or fat into small particles and dispersing them evenly in water, preventing them from recombining. deflocculation is the separation of insoluble particles such as dust, earth, and/or clay, that repel each other. Detergency is the property of suspending both of these types of particles in solution and rinsing them away without re depositing on a freshly washed surface. MOXIE 3000 SUPER SOAP effectively accomplishes all of the above.

Precautions:

MOXIE 3000 SUPER SOAP should be handled using rubber gloves and suitable eye protection such as goggles or face shield.

Limited Warranty:

Because the manufacturer has no control over the dispensing or use of this product, no warranty is expressed or implied. In no case will the manufacturer be liable for damage resulting from failure to use in accordance with directions.
